Date:

Sewer Cleaning and Inspection

Please note that Wessuc will be conducting Sewer Cleaning and Video Inspection on your street within 48 hours of the date stamped on this notice.

Steps you must take before sewer cleaning and inspection:

Occasionally during cleaning and inspection, air pressure in the sewer can cause water to splash out of your toilets, sink and drains. Please take the following precautions to prevent water damage in your home:

1. Close lids and cover toilet bowls when not in use
2. Insert drain plugs in all sinks and bathtubs when not in use
3. Remove all floor mats in bathrooms
4. Cover all basement floor drains

You may put things back as they were when the equipment has moved off your block.

During and after sewer cleaning and inspection:

Sometimes the sewer cleaning and inspection leaves an odour in the home. If so, run some water down all sink and bathtub drains, flush toilets, pour a pail of water into each basement floor drain and open your windows. After a short time the odour should disappear.

Our company will take every precaution to minimize interruptions to the normal living of your family, office, or business. Should you require any information please contact our office at 519-752-0837.

Thank you for your Cooperation.
Yours truly,

Tyler Loveday
Project Manager - CCTV/ Flushing
