Re: County Road 6 Water Service Change Overs

Dear Resident,

Loyalist Township is tentatively set to begin construction work along County Road 6 in front of your property in a few weeks. This work will include switching your water service to a newer main and abandonment of the old main, replacement of the water shut of valve on your property, and installation of a new water service to the main. During this project there will be one short duration water shut off and residents will be notified well in advance.

The Contractor will be instructed to maintain access to all driveways; however, circumstances may cause temporary disruptions. If this is to occur the Contractor will contact affected residents individually to plan for any closures and make every attempt to accommodate special circumstances. All disturbed areas such as driveways, and lawns will be returned to pre- construction state at the completion of the work.

We are committed to ensuring that this project will have the least impact to property owners along the road and a Township representative will be on site at all times during the work. They will be more than happy to discuss any questions or concerns you have.

To assist us and to protect you, we are requesting information about any private underground services you may have on your property including sump pump, in ground irrigation system or any other drainage line that may or may not be disturbed during construction (i.e. a line that may drain into the existing roadway ditch). Loyalist Township wants to ensure that these lines are not blocked or damaged during the construction project.

I am available to meet at your residence with appropriate social distancing and discuss any concerns you may have. Please contact the undersigned at the number or e-mail below to set up an appointment or if you have any other questions or concerns.

Yours truly,

Joe Gratton
Project Supervisor
